Programming Languages: JavaScript | Apex | SOQL | HTML | CSS

Tools: NodeJS | React | Salesforce | Git | MongoDB | JIRA | UiPath

WORK EXPERIENCE

ICF

January 2022 - Present

Salesforce Developer

- Built the Capital Projects Fund application which helped states and tribal communities gain access to more modern infrastructures, allowing easier accessibility to critical services.
- Created technical documentations on the deployment process and Capital Projects Fund program for new incoming developers.

Creative Systems & Consulting (Acquired by ICF)

June 2020 - January 2022

SaaS Developer

- Implemented automation using UiPath in order to validate and extract data from various formatted excel files. Which resulted in removing manual work and reducing processing time by 80%.
- Organized and conducted demonstrations on robotic process automation to internal interest groups.

PROJECTS

Memories Social Media App

Fall 2022

- Fully Deployed fullstack application utilizing MongoDB, Express, React, and NodeJS.
- Created a Restful API to interact with posts that the user creates.
- Added authentication using Google OAuth and JSON Web Tokens to protect specific services and routes.

Ecommerce Website

Winter 2022

- Integrated Stripe for secure payment processing.
- Created the user interface and cart functionality with React.
- Utilized Sanity.io to create and manage products shown in the front-end.

EDUCATION

Virginia Commonwealth University, Richmond, VA

May 2019

Bachelor of Science in Computer Science

Certifications: Salesforce Certified Javascript Developer | UiPath Certified RPA Associate
