Programming Languages: JavaScript | Apex | Java | SOQL | HTML | CSS

Tools: NodeJS | React | Salesforce | Git | MongoDB | Postman | JIRA | Confluence | UiPath

WORK EXPERIENCE

ICF

January 2022 - Present

Salesforce Developer

- Developed and maintained web based applications on the Salesforce platform through Apex and Javascript.
- Front-end development for treasury public sites.
- Built automation utilizing Flows and Apex Triggers.
- Created technical documentations on the deployment process and Capital Projects Fund program for new incoming developers.

Creative Systems & Consulting (Acquired by ICF)

June 2020 - January 2022

SaaS Developer

- Implemented automation using UiPath in order to validate and extract data from various formatted excel files. Which resulted in removing manual work and reducing processing time by 70%.
- Organized and conducted demonstrations on robotic process automation to internal interest groups.

PROJECTS

Memories Social Media App

Fall 2022

- Deployed full stack application utilizing MongoDB, Express, React, and NodeJS.
- Created a Restful API to interact with posts that the user creates.
- Added authentication using Google OAuth and JSON Web Tokens to protect specific services and routes.

Envera Health Virtual Agent Chatbot

Spring 2019

- Made a chatbot that scheduled doctor's appointments through the phone using Amazon Web Services.
- Designed and integrated a database that stored customer's and doctor's information using AWS RDS.
- Utilized AWS Lambda and Lex for data validation and voice processing.

EDUCATION

Virginia Commonwealth University, Richmond, VA

May 2019

Bachelor of Science in Computer Science

Certifications: Salesforce Certified Javascript Developer | UiPath Certified RPA Associate
