Virginia Commonwealth University, Richmond, VA

## SKILLS

Programming Languages: Java, JavaScript, HTML, CSS, SQL
Web Frameworks: React, NodeJS, Bootstrap
Version Control: Git
Language Skills: English, Vietnamese

## ACADEMIC PROJECTS

**Envera Health Virtual Agent Chatbot**                                Spring 2019
• Work with a team of 2 peers using an agile approach to develop an intelligent chatbot.
• Chatbot schedules an appointment for a user without human intervention through a phone call.
• Utilizes AWS services like Amazon Lex, Connect, Lambda, and Relational Database Service
• Incorporates a database that stores customers and doctor's information using MySQL

## PERSONAL PROJECTS

**Electronic Commerce Website**                                Summer 2019
• An electronic commerce website selling clothing products. Developed using react for the client side and NodeJS to handle the requests.
• Made using React, NodeJS, JavaScript, HTML, Bootstrap, and CSS

**Web Game**                                Fall 2018
• Allowing two users to join a chatroom to interact and play rock-paper-scissors with each other.
• Made using NodeJS, JavaScript, HTML, and CSS

**Twitter Bot**                                Summer 2018
• A bot used to monitor a twitter account for a keyword, then notifies a specific user when that keyword is used in a status post from the monitored account.
• Made using the NodeJS and Twitter API
